

NEWS ALERT – NEW PRODUCT

Viper WRL - New Mini MK 3

Lubrication Engineering, the leading lubrication solutions provider, is excited to announce the launch of the New Viper Mini MK 3.

The new Viper Mini MK 3 features new cutting-edge capabilities and a robust design providing users with advanced design specifications to accommodate wire ropes from 6mm to 44mm and incorporating new optional dual inlet lubrication points for high-speed applications.

The new flat Seal design allows for the flow of lubricant to create a more positive seal enabling lubricant pressure to migrate deep into the wire rope for total coverage.

A high-performing Automated Wire Rope Lubricating System, the Viper provides a safe, fast, efficient, and environmentally responsible solution for lubricating wire ropes for industrial applications in even the harshest of environments.
